PROFESSIONAL SUMMARY

Third-year BSc (Hons) Computer Science undergraduate with hands-on experience building full-stack, backend, data-driven and AI-enabled applications through client and academic projects. Experienced with TypeScript, JavaScript, Python, Java, React, Node.js, NestJS, Spring Boot, FastAPI, PostgreSQL, MongoDB and Docker, with practical experience in APIs, database architecture, authentication, testing and CI/CD. Passionate about software engineering, backend systems, data engineering, AI and cloud technologies.

TECHNICAL SKILLS

Programming Languages: TypeScript, JavaScript, Python, Java, C#, SQL, Dart

Frontend: React, Next.js, React Native, Vite, Tailwind CSS, Material UI

Backend: Node.js, Express.js, NestJS, Fastify, FastAPI, Spring Boot, Spring Security, ASP.NET Core, REST APIs, JWT, OpenAPI

Databases: PostgreSQL, MySQL, SQL Server, MongoDB, Redis

ORM / Data Access: Prisma, Hibernate / JPA, SQLAlchemy, Mongoose

Data & Machine Learning: Pandas, NumPy, scikit-learn, TensorFlow, Prophet, Regression, Predictive Analytics, Time-Series Forecasting

AI / NLP: OpenAI API, LangChain, Embeddings, ChromaDB, Hugging Face Transformers, NLP, Semantic Search

Cloud & DevOps: AWS Lambda, AWS API Gateway, Docker, Docker Compose, GitHub Actions, CI/CD

Testing & Engineering Tools: Git, GitHub, Jest, React Testing Library, Pytest, JUnit, Mockito, SonarQube, JaCoCo, Maven

PROFESSIONAL & CLIENT EXPERIENCE

Full-Stack Developer — CravesDT Bakery

Client Project

- Developed and deployed a full-stack bakery POS and management platform as part of a two-person development team; the system is actively used by the client.
- Built functionality across point-of-sale, inventory, sales, production, purchasing, customer and loyalty management, reporting, authentication and administration.
- Worked across the full stack, including PostgreSQL database architecture, NestJS/Fastify API development, React interfaces, authentication and Docker-based deployment.
- Communicated directly with the client regarding requirements, requested changes and issues, conducted a software demonstration, and contributed to system architecture, repository management and task coordination.

PROJECT EXPERIENCE

Warehouse Management System

React, TypeScript, Vite, Tailwind CSS, Material UI, Node.js, Express.js, MongoDB, JWT

- Developed a full-stack warehouse management platform covering inventory management, operational workflows, dashboards, reporting and location-based functionality.
- Built RESTful backend services using Node.js and Express.js with MongoDB, implementing JWT-based authentication and authorization.
- Integrated geospatial functionality and data visualization to support operational monitoring and decision-making.

SpendWise — Personal Finance & Analytics Platform

FastAPI, PostgreSQL, Redis, React Native, TensorFlow, scikit-learn, Prophet, Docker

- Developed a personal finance platform combining expense management, analytics and predictive insights.
- Built backend services using FastAPI, PostgreSQL and Redis, with machine-learning functionality for forecasting, classification, recommendation and predictive analytics.
- Applied TensorFlow, scikit-learn and Prophet for data-driven features and incorporated Docker, automated testing and GitHub Actions CI/CD workflows.

EduManager — Student Management System

React, TypeScript, Java 17, Spring Boot, Spring Security, JPA/Hibernate, MySQL, Docker

- Developed a full-stack student management system using React and TypeScript on the frontend with Java and Spring Boot on the backend.
- Implemented REST APIs, JWT-based authentication and authorization, Spring Security and database persistence using Spring Data JPA / Hibernate with MySQL.
- Applied automated testing and software quality practices using JUnit, Mockito, Jest, React Testing Library, JaCoCo and SonarQube, supported by Docker and GitHub Actions.

TracelQ — AI & Computer Vision Platform

Python, FastAPI, Computer Vision, Machine Learning, React

- Developed an AI-powered application incorporating computer vision and facial recognition capabilities.
- Built backend services using FastAPI and applied structured software architecture principles including domain-driven design.
- Integrated machine-learning functionality with a web interface to support automated image-based processing and analysis.

EDUCATION

BSc (Hons) in Computer Science — NSBM Green University | 2023 — Expected 2027

Third Year, Second Semester

GPA: 3.50 / 4.00

LANGUAGES

English: Professional Working Proficiency

Sinhala: Native
